

# CITATION CJ3

## ZS-DPP

The Cessna CJ3 is ideally suited to African operating conditions where large distances need to be covered followed by operating out of short airstrips. The CJ3 has a flying speed of over 700 kilometres an hour but can operate out of airfields less the 1000 meters long. The aircraft is configured for 2 crew and six passengers in a centre club arrangement. The aircraft also features an external baggage access which spares passengers the inconvenience of loading and unloading through the cabin.
